DETAILED ACTION

Applicant's election with traverse of restriction requirement in Paper No. 10 is acknowledged. The traversal is on the ground(s) that claim 1 is generic and that species classified within a single class/subclass should be examined together. The examiner agrees that claim 1 is generic. The examiner does not agree that species classified in a common subclass renders them not burdensome to examine together. It is the examiner's position that examining 5 species is burdensome regardless of the classification of the species.

The requirement is still deemed proper and is therefore made FINAL.

Claims 12-14 are withdrawn as they are directed to the non-elected species shown in Figs. 5 and 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 8-11, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by HOFMANN (U. S. Patent No. 6,009,345). Hofmann discloses an elongated member 120 having two discrete electrodes 124, 126 spaced along a transverse axis of the elongated member with insulating material (i.e., air) between the electrodes that are simultaneously activatable. (See Fig. 6 and columns 8, 9)

Allowable Subject Matter

Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (703) 305-5873. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays.
